

Complete voice and data solution with Power over Ethernet to facilitate implementation of converged applications

## OVERVIEW

The 3Com® NBX® PoE Bundle, featuring the 3Com Baseline Switch 2426-PWR Plus solution and 3Com NBX V3000 Analog Platform, represents a unique value—an IP telephony and Power over Ethernet (PoE) switch solution with features and price optimized for the small-to-medium business market. Easy-to-order and install, the solution economically delivers the benefits of a converged network.

## KEY BENEFITS

### PROVIDE AN EASY PATH TO NETWORK CONVERGENCE

Organizations with minimal IT staff and the need for an exceptionally cost-effective solution can now enjoy the benefits of Voice over IP (VoIP) communications with easy installation that minimizes network disruptions and the need for a fork-lift network upgrade. The Bundle offers plug-and-play deployment, auto-detection for impressively simple moves, adds and changes and a single cable run for both voice and data devices. Additionally, the web-configurable 2426-PWR Plus switch automatically detects and prioritizes NBX IP telephony traffic, transparently ensuring the highest possible audio quality.

### IMPLEMENT ADVANCED VOIP APPLICATIONS

The Bundle delivers enterprise-class capabilities that are customized and priced for small-to-medium businesses. A full range of productivity-enhancing features include 400 hours of voicemail storage, four analog trunk ports, one station-side port for an analog home or fax machine, four auto-attendant/voice mail ports, call detail reporting (CDR), the award-winning NBX NetSet™ browser-based system administration, NBX pcXset™ softphone functionality, automatic call distribution (ACD), voice mail/email integration and a personal operator for customizable call handling.

### MAXIMIZE RETURN ON INVESTMENT

Organizations can implement step-by-step expansion, matching their network to business needs and budget. The addition of an NBX Expansion Chassis boosts system support to as much as 1,500 devices and adds a wide array of advanced functionality for network, remote office and T1/E1 access. The type and number of IP phones—and access points if wireless connectivity is desired—can be determined over time. Full 802.3af-compliant PoE support on all ports of the 2426-PWR Plus switch can power 3Com IP phones, lowering total cost of ownership by eliminating the need to run additional wiring to each phone.
